TP15S10A5100
Single brewer with one
1.5 gallon TFT15G dispenser

TP15T10A5100
Twin brewer with two
1.5 gallon TFT15G dispensers

G3 ThermoPro™ Digital Coffee Brewing Systems

Curtis G3 Technology combines precision brewing capability with an easy-to-use interface. All brewing functions are displayed in real time, not a coded system of indicators. Curtis ThermoPro™ systems are factory set for out-of-the-box operation with pre-programmed recipes that ensure a consistent brew, every time. And with scroll-through menus, it's just as easy to fine-tune the brewing process for your exacting gourmet coffee profile.

Thermal FreshTrac™ Dispensers

SIGNALS, MONITORS, AND MANAGES COFFEE QUALITY & VOLUME

The key to a well executed coffee program is consistently serving hot, fresh coffee every time. Monitoring the holding time and the amount of coffee in a dispenser is crucial to freshness and quality. Without proper management, coffee can get cold or stale from sitting too long. Even worse, dispensers can run out and customers have to wait for a new brew.

Curtis' Thermal FreshTrac™ is a simple visual system that communicates time and volume that's easy to see, even from across the room. The FreshTrac™ system is activated from the moment coffee is brewed into the dispenser to keep your coffee program on track.
